### **DETAILED ACTION**

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-37 and 59-73, drawn to a routing element for use in a semiconductor device assembly, classified in class 257, subclass 668.
  - II. Claims 38-58, drawn to a method for designing a routing element for use in a semiconductor device, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of positioning said at least one routing element at least partially over said at least one semiconductor device, you could position said at least one routing element laterally adjacent to said at least one semiconductor device.
